Sustainable Packaging Food & Beverage

Introduction

Footprint has a clear vision: To create a healthier planet by reducing single-use and short-term use plastics.

Footprint designs, develops, and manufactures 100% plant-based fiber packaging solutions that aim to be biodegradable, compostable, and recyclable. Footprint makes it easy for companies to switch out of plastic to preserve our future.

Patented Materials & Process Technologies

- A variety of plastic-free options available
- 1,233 Foreign and Domestic Pending Claims
- 10 Issued U.S. Patents

Our Sustainable Packaging Solutions

Quick Service Restaurant

- To-go containers (clamshells & container bases with fiber or PET lids)
- Bowls with lids
- Plates
- Cafeteria trays/food display trays
- Condiment cups with fiber and PET lids
- High-performing paper straws
- Drinking cups, lids & drink carriers*
- Sushi trays and PET lids
- Plastic-free, bio-based utensils
- Coolers and picnic kits

**See our drinking solutions brochure.*

Why you should care

Better for Human Health

Showcase your commitment to protecting your customers' health.

Footprint® ecoSentials products:

- Made with PFAS-free fiber
- Tested in compliance with FDA test method 21 CFR 176.170
- Produced in HACCP certified food-safe factories

Earth Digestible

Footprint's ecoSentials line of products are bio-based per ASTM D6866.

Engineered to Perform

- Footprint fiber has proven durability and provides a superior consumer experience
- Freezer and Refrigerator compatible

Healthy Planet, Healthy People

Footprint's products address these planet and human health issues:

- Plastic and their forever chemicals pose a long term threat to our food, our planet and our health
- By 2050, plastic pollution will outweigh all marine life in our oceans
- Toxic chemicals in plastic decrease testosterone leading to infertility and cardiovascular disease mortality
- Endocrine system disorders, like Type 2 Diabetes, are rapidly increasing based on toxic chemicals increases in humans bodies
- Plastic toxins in pregnant mothers can lead to Gestational Diabetes; babies are born pre-polluted with over 200 chemicals
- The functional properties of plastic are difficult to replicate with PFAS-free plant-based solutions
- Incumbents have been unable to deliver a credible fiber-based alternative
- Microplastics are everywhere: in our air, our water supply, our food chain, and our bodies
